Training Programme on Mushroom Production Technology Organized by KVK, Panchkula

Morni (Panchkula), October 29

A three-day vocational training programme on "Mushroom Production Technology" was successfully organized by Krishi Vigyan Kendra (KVK), Panchkula at Baladwala, Morni from 27th to 29th October. The objective of the programme was to provide farmers and rural youth with scientific knowledge, practical skills and business insights for taking up mushroom cultivation as a profitable Agri-enterprise.

During the training, participants were introduced to different aspects of mushroom farming, including spawn production, substrate preparation, disease management, harvesting techniques, value addition and marketing strategies. Practical demonstrations were conducted at the site to give hands-on experience to the trainees.

A total of 27 participants, including majorly women farmers, attended the training with great enthusiasm. Their active participation reflected growing interest in mushroom cultivation as a means of income generation and rural self-employment.

Dr. R. S. Chauhan, Chief Executive Officer, Haryana Kisan Kalyan Pradhikaran (HKKP), delivered a special lecture during the programme. He highlighted the importance of mushroom cultivation in promoting crop diversification, nutritional security and entrepreneurship among farmers. Dr. Chauhan encouraged participants to adopt scientific practices and explore cooperative models and local marketing avenues to increase their profitability. He also appreciated the efforts of KVK, Panchkula, for extending such skill-oriented trainings to remote hilly areas like Morni.

The programme concluded with an interactive session and certificate distribution ceremony, where all participants were presented with training certificates in recognition of their successful completion of the training.
