Additional CEO, HKKP Reviews Natural Farming Activities at Palwal and Ambala

Palwal (September 25) & Ambala (October 25).

The Additional Chief Executive Officer of Haryana Kisan Kalyan Pradhikaran, Sh. Hitesh Kumar Meena, IAS, visited Palwal and Ambala districts to review and promote ongoing activities under the Natural Farming Mission. The visits were aimed at encouraging farmers to adopt eco-friendly and sustainable agricultural practices that enhance soil health and profitability.

At Palwal, the Additional CEO visited an exhibition on natural farming and agri-entrepreneurship, where progressive farmers and entrepreneurs displayed a wide range of organic vegetables, mushrooms, bio-inputs and eco-friendly farming products. The exhibition reflected the growing enthusiasm among farmers to adopt sustainable methods that enhance soil health and reduce chemical dependency. During the visit, the officer interacted with farmers and appreciated their efforts towards reducing chemical dependency in agriculture. He emphasized that natural farming is not just a technique but a movement for restoring soil fertility and improving farm income.

At Ambala, the Additional CEO attended a farmers' seminar on natural farming, where he was felicitated with a memento by the organizers in recognition of his contribution to promoting sustainable agriculture. The seminar included discussions on natural inputs, soil health improvement and farmers' experiences in adopting organic practices. The seminar witnessed active participation from scientists, officials and farmers, who discussed the advantages of natural farming and shared success stories from across Haryana.

The Additional CEO appreciated the collective efforts of farmers and field officers, emphasizing the need for wider awareness and adoption of natural farming techniques for a greener and more prosperous rural economy. He highlighted that such initiatives not only reduce input costs but also enhance soil productivity and long-term sustainability. He further encouraged field-level officers to organize regular demonstrations and exposure visits to successful natural farming clusters so that more farmers can learn from practical examples. The visit concluded with a call to make natural farming a community-driven movement ensuring better income, improved soil health and a healthier environment for future generations.
